## Speech-Language Pathology Assistants A Resource Manual, Second Edition

Release Date: 02/14/2019

450 pages, B&W, Softcover, 7" x 10"

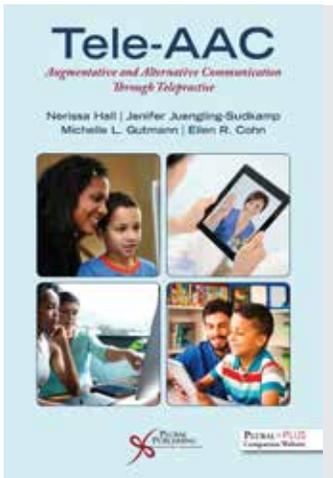

ISBN13: 978-1-94488-326-3

Price: \$84.95

Written specifically with speech-language pathology assistants (SLPAs) in mind, this practical, easy-to-use manual can be used by both SLPAs and SLPA educators. The text defines the roles of SLPAs and their supervisors—offering additional insight into the scope of practice of an SLPA per current American Speech-Language-Hearing Association (ASHA) recommendations—and includes discussions, strategies, and examples of real-world issues, such as using augmentative and alternative communication (AAC) and working with individuals with autism spectrum disorders (ASD). Also included within the chapters are “Things to Consider” sections, which address important factors and modifications that can enhance the effectiveness of treatment activities. For example, incorporating play, literacy, and speech sound remediation into treatment or modifying the clinical interface to enhance group therapy dynamics for children and adults.

Initial chapters are devoted to specific aspects of an SLPA’s development, such as chapters on ways SLPAs can enhance clinical service through understanding of goals, lesson plans, data collection, and note-writing. Likewise, chapters on professional practice offer insight into ethical problem-solving, presenting a professional image, developing mentoring relationships, working with culturally and linguistically diverse populations, and the use of self-reflection for self-improvement. These chapters are followed by key principles for SLPAs to incorporate in clinical services provided to specific populations and disorders.

New to this edition are four important chapters applicable to the work of an SLPA. This includes a chapter specific to behavioral principles and the use of positive behavioral supports and intervention (PBIS). New chapters were added in the areas of early intervention and the important topic of language intervention in children—both of which are highly pertinent to the roles of most SLPAs. A chapter was also added to address key principles in service provision for adults with neurologic disorders, including an overview of common treatment approaches for the disorders of aphasia, right hemisphere brain dysfunction (RHBD), cognitive-communicative disorders associated with TBI, apraxia of speech, and dysarthria. The second edition also contains access to a PluralPlus companion website with helpful appendices to support the material covered in the text, such as checklists, exercises, forms, and other clinical tools and resources specific to SLPAs.

The goal is to provide readers with fundamental information about policy and service delivery of AAC services via telepractice to enable clinical practice.

## Rare Disorders That Cause Dysphagia A Guide for Speech-Language Pathologists

**Violet O. Cox**

Release Date: 03/06/2020

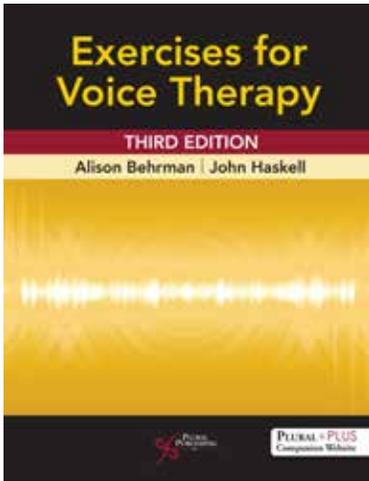

170 pages, B&W, Softcover, 6" x 9"

ISBN13: 978-1-63550-142-1

Price: \$99.95

This resource manual is designed to help medical speech-language pathologists identify the rare disorders that cause dysphagia and offer practical, therapeutic approaches to treatment. Most medical speech-language pathologists are acquainted with common etiologies of dysphagia, such as strokes, head injury, brain tumors, etc. However, there are less common disorders and syndromes that contribute to dysphagia that are not included in most textbooks and reference guides. Consequently, many clinicians who specialize in swallowing disorders are unaware of the impact that most uncommon diseases can have on swallowing.

Clearly organized, each chapter is divided into six sections: Definition, History, Etiology, Epidemiology, Clinical Manifestations of Dysphagia, and Management of Dysphagia. Each chapter begins with a list of key terms that are bolded throughout the text and included in a glossary.

## Here's How to Do Accent Modification A Manual for Speech-Language Pathologists

**Robert McKinney**

Release Date: 03/15/2019  
306 pages, B&W, Softcover, 8.5" x 11"  
ISBN13: 978-1-63550-007-3  
Price: \$69.95

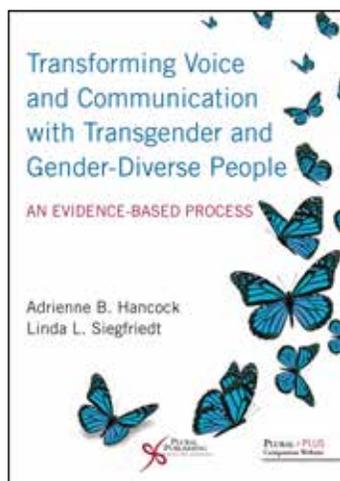

Designed for speech-language pathologists (SLPs) working with clients on accent modification in American English, this text provides copious advice and many diverse techniques for teaching accent modification, from the level of basic sounds to the level of discourse. A growing number of non-native speakers are interested in improving their communication skills and SLPs need preparation to work with this clientele.

The text emphasizes realistic goal setting, so that clients focus on becoming effective communicators as opposed to sounding exactly like native speakers. The objective is a balance between clear and natural speech. Many SLPs favor intelligibility over naturalness because of their backgrounds working with speech delayed children, but with non-native speakers this often leads to unnatural speech and listeners focus on how

something is said as opposed to what is said.

*Here's How to Do Accent Modification* is uniquely geared toward the skills and backgrounds of SLPs working with clients in a one-on-one setting, but is also an excellent introductory text for any English as a Second Language (ESL) teacher. Also included with the text are numerous practical activities and worksheets for working with clients.

A PluralPlus companion website presents the worksheets in a downloadable format along with audio files and video clips to demonstrate working with non-native speakers.
